

STEALTH

HD IRONS

FEATURE	BENEFIT
DESIGNED FOR SUCCESS	Engineered to deliver high launching distance with draw bias, the Stealth HD iron has been designed for the golfer looking to hit more successful shots more often.
PERFORMANCE DRIVEN SHAPING	The low profile head has a shallow face height and a wide sole with a large step down to keep CG low for easier launch. Increased sole curvature assists with turf interaction.
CAP BACK™ DESIGN	The multi-material Cap Back™ Design utilizes high-strength stainless steel and ultralight weight polymers. Designed to maximize distance, forgiveness and feel with an extremely low CG.
ECHO® DAMPING SYSTEM	Positioned inside the iron head, the ECHO® Damping System uses a soft polymer blend and multiple contact points across the face to channel away harsh vibrations creating a forged-like feel.
THRU-SLOT SPEED POCKET	Patented TaylorMade® technology engineered to maximize face flexibility for increased ball speed and forgiveness for mis-hits low on the face.
