

STEALTH²

FAIRWAY

FEATURE	BENEFIT
ADVANCED INVERTED CONE TECHNOLOGY	Variable face thickness is engineered to maximize ball speed across the face while maintaining playability in a confidence inspiring shape.
ULTRA LOW-CG DESIGN	Center of gravity is positioned lower compared to the original Stealth™ Fairway, delivering a more centered CG projection for better performance off the deck without sacrificing distance. To accomplish this feat, engineers lowered CG by placing a heavy internal mass toward the rear of the club and lowering the crown by 2mm.
3D CARBON CROWN	3D carbon crown pulls mass away from the high toe area, allowing more weight to be positioned rearward for optimal forgiveness and maximum playability.
V STEEL™ SOLE DESIGN	This iconic TaylorMade technology stays true to its heritage by improving turf interaction and versatility.
ADVANCED LASER ALIGNMENT	Providing visual contrast between face and crown, the laser etched aid is designed to highlight directional alignment for boosted confidence and accurate aim.
THRU-SLOT SPEED POCKET	Our flexible Speed Pocket™ design is engineered to maximize ball speeds and produce additional forgiveness on low-face strikes.

LAUNCH AND SPIN	FLIGHT BIAS
Mid-High Launch / Mid-Low Spin	Neutral

SHAFT (MID-HIGH FLIGHT)	SHAFT (MID-HIGH FLIGHT)
