

STEALTH²

RESCUE[™]

FEATURE	BENEFIT
---------	---------

ADVANCED INVERTED CONE TECHNOLOGY

Variable face thickness engineered to maximize ball speed across the face while maintaining conformance and improving durability in each individual hybrid.

REFINED CG PLACEMENT

Center of gravity is positioned lower compared to the original Stealth Rescue, delivering a more centered CG projection to improve performance on middle-face strikes. Engineers used weight savings from the infinity carbon crown to redistribute mass towards the rear of the club for enhanced MOI and forgiveness.

V STEEL[™] SOLE DESIGN

This iconic TaylorMade technology stays true to its heritage by improving turf interaction and versatility.

TWIST FACE[®]

The proven Twist Face[®] design helps golfers overcome inherent mis-hit tendencies for straighter shots.

THRU-SLOT SPEED POCKET

Our flexible Speed Pocket[™] design is engineered to maximize ball speeds and produce additional forgiveness on low-face strikes.

LAUNCH AND SPIN	FLIGHT BIAS
